

H2OMIT VENT DRAINS

H2Omit Vent Drains allow accumulated water to drain out the bottom of an enclosure. The UL-approved vent drains also function as an air pressure equalizer, reducing the harmful effects of temperature-induced vacuums that could pull water and moisture into the enclosure.

FEATURES & BENEFITS

Uses gravity to remove collected liquids

One-way mechanical shut-off when pressure is equalized prevents water and contaminants from entering the enclosure

Helps reduce corrosion that can limit the life of internal electrical and electronic components

Installs in a 7/8-inch hole in the bottom of enclosure with provided nut or in a 1/2-inch NPT/NPS threaded conduit hub

Installs in the bottom of mild steel, aluminum, stainless steel or non-metallic enclosures

Maintains the enclosure UL Type rating when properly installed

Stainless Steel Vent Drain

Corrosion-resistant polyester material with a Type 304 stainless steel sleeve

Non-Metallic Drain Vent

Corrosion-resistant polyester material

2.00-inch long x 1.25-inch outside diameter
